

EMMEBI IMPIANTI AEROTEXTILE TECHNOLOGY

PHANTOM filtration system TM

THE REVOLUTION IS HERE

- ***Highest filtration surface area in the market.***
- ***Lowest Kw consumption.***
- ***No Dust, SAP, Pulp residues in the containing box.***
- ***Possibility to install the filter directly in the ambient, without any containing room.***
- ***Pressure drop control.***
- ***Compliant with ATEX.***
- ***Huge energy saving (from 50 to 90% less than the other filters).***
- ***Minimizes the space required.***
- ***PATENTED***

Emmebi's new **Phantom filtration system** is the revolution for the filtration of any kind of diapers line.

This new system conjugates decades of experience in textile, nonwoven, paper, ceramic and chemical filtration and provides HEPA H14 filtration without the use of a final filter and in several application, without even a central suction fan.
